PATENTED

"I was thoroughly impressed by the fry pan's exceptional release properties and outstanding durability. Food releases effortlessly with little to no oil, and even after repeated high-heat use with metal utensils, the surface showed no wear or scratching.

The PFAS-Free treatment eliminates any concern about peeling or burning, while still delivering professional-grade performance up to 500°C (932°F). This innovative technology represents a major step forward in cookware that combines superior release, resilience, and versatility."

- Easy removal with our "lock-on" collar
- Three popular shot sizes: 1oz, 1-1/4oz, 1-1/2oz, wide cork (for larger bottles), and flip-tops (keeps the fruit flies out)

"I was thoroughly impressed by the fry pan's exceptional release properties and outstanding durability. Food releases effortlessly with little to no oil, and even after repeated high-heat use with metal utensils, the surface showed no wear or scratching.

The PFAS-Free treatment eliminates any concern about peeling or burning, while still delivering professional-grade performance up to 500°C (932°F). This innovative technology represents a major step forward in cookware that combines superior release, resilience, and versatility."

INDUCTION READY ALUMINUM COOKWARE

Hybrid technology bonds a stainless steel plate to aluminum cookware, as effective in utilizing induction technology as full stainless steel cookware.

- Deep drawn 3003 Aluminum body is durable and highly conductive, better than stainless steel cookware for quickly and evenly distributing heat
- Stainless steel bonded plate allows for magnetic contact with induction cooktops
- Thicker handles and heavier rivets than standard cookware allow for secure comfort in transporting cookware
- Can also be safely used with gas or electric ranges
